

Jia Yi Ooi

Senior Full-Stack Engineer

Penang, Malaysia (UTC+8) · Remote worldwide or relocation · me@jyooi.com
jyooi.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

Senior full-stack engineer with 8+ years of experience. Last 5+ years remote with teams in Singapore, the United States and Australia. Builds typed UI component systems and the real-time services that support them. Recent work is the uchat Business inbox.

The inbox handles 100k+ messages per day with React and TypeScript and FastAPI on Kubernetes. Works worldwide as a contractor through my registered company. Also accepts direct employment with relocation.

LANGUAGES & TECHNOLOGIES

<!-- ste-disable-next-line sentence-length -->

Languages: TypeScript, Python, Elixir, SQL
Frontend: React, Next.js, Vite, TanStack Router, React Query, Socket.IO, Electron, Playwright, Vitest
Backend: FastAPI, PostgreSQL, REST API design, load testing
Infrastructure: Kubernetes, Docker, CI/CD (GitHub Actions), Linux, Git
Other: Design systems, real-time systems, Web3 wallets (MetaMask, Tezos)

EXPERIENCE

Career development sabbatical

Apr 2026 – Present

- Built [elixir-opentui](#), an open-source terminal UI framework for Elixir.
- Built [agent-simple-english](#), a linter for Simplified Technical English.
- Built [pi-ask-user-question](#), a pi extension for structured user questions.
- Prepares for the Certified Kubernetes Administrator examination.

uchat

Nov 2024 – Apr 2026

Senior Software Engineer, Business unit

Remote (Singapore)

Business inbox of uchat, a consumer messaging app in Thailand. More than 500 companies run their B2C conversations on it.

- Shipped the real-time inbox that handles 100k+ messages per day for 500+ business accounts. The system uses React and TypeScript and FastAPI on Kubernetes.
- Built a strongly typed UI component system for the inbox. The system gives the team a shared vocabulary for new screens.
- Tested the chat service to 100k concurrent connections before traffic growth.
- Reviewed the team frontend work and defined feature scope with product and design.

Accomy

Feb 2024 – Oct 2024

Senior Software Engineer

Remote (Singapore)

- Led 2 frontend engineers and shipped the MVP of a corporate hotel booking platform in 4 months. Started from an empty repository and released the product.
- Created the Next.js and TypeScript codebase as a new project. Mentored 2 engineers on the codebase and made architecture decisions with product and design.

Coinalpha (Hummingbot)

Jun 2021 – Nov 2023

Software Engineer

Remote (US)

Hummingbot is an open-source market-making framework for crypto trading bots.

- Built the React and FastAPI liquidity mining platform that about 1,000 bot operators use. They help with about \$100k in daily trading volume.
- Built and published [@hummingbot/hbui](#), the Hummingbot design system. The system syncs design tokens from Figma into a Tailwind and React package that teams use for frontends.
- Fixed memory leaks that exhausted 8 GB machines within hours. The fix cut steady-state memory by about 90 percent.

Areca System

2020 – 2021

Contract Software Engineer

Penang, Malaysia

- Built an Electron point-of-sale system for a 30-store supermarket chain.

Aglive

2017 – 2020

Software Engineer

Remote (Australia)

- Built and operated the tracking dashboard on the Austracker platform. The dashboard covers 500+ trucks and buses.
- Led deduplication of multi-million-row GPS data and removed about 25 percent duplicate records from customer reports.

PROJECTS

- **elixir-opentui** - terminal UI framework for Elixir with a Zig NIF backend. It uses Elm-inspired architecture, a declarative View DSL, and 15+ widgets with double-buffered render.

EDUCATION

B.IT Communications and Networking (Hons), Universiti Tunku Abdul Rahman

May 2017
